SOMETHING A LITTLE SPECIAL...

We have an ever-evolving wine list here at The Bruce. Some of these bottles we only have one of, some we have a case of. We recommend ordering the red wines at least 5 hours before drinking to allow them to be at their best.

NATURAL WINES
What Is Natural Wine?

Natural wine is loosely defined as wines produced with very little intervention, low sulphites and no chemicals on crops. In its purest form it is fermented grape juice, and therefore normally both organic and vegan. Some may say it is "trendy", but I'd say vintners have been making natural wine for thousands of years.

Why Do We Stock Natural Wine?

Natural wine is better for the planet. It doesn't add chemicals to the environment, it increases biodiversity and it uses greener farming methods. Producers around the world are taking a more holistic approach, establishing an equilibrium within the vineyard, where they put back as much as they take. Also, perhaps most importantly, we really like it.

All our Natural Wines are bought from Wayward Wines, Leeds @waywardwine

THORNBOROUGH CIDER

Thornborough Cider is a small-batch craft cidery on the edge of the beautiful Yorkshire Dales. Made by Kingsley who is both local and a fellow Bruce patron.

Kingsley and his team produce a small range of natural ciders from their own and local orchards, made with nothing but pure apple juice, wild fermentation and patience.
